

SANDERSON FIELD R.C. NEWS

CHARTER NO. 3079

August 2-4 Throwdown in the Sound

CLUB MEETING

*This months club meeting will be held
on Thursday August 8th. at*

PUD #3

**2621 E John's Prairie Rd
Shelton, WA**

Treasurers report was read and
accepted as read.

We had a fly away airplane that
ended up over by Kapowsin.
Please, if you are having any issues
with your plane, take it home and
sort it out.

Events -

Dawn Patrol - we had 9
registered pilots. The day
was a little windy but was
right down the runway. All
in All a good time was had
by all.

Air Show - The Flight
museum sent us a thank you
card for our participation.
Dick thanked all the help he
had from both clubs.

Upcoming events -

July 20th & 21st Fly-in/ fun fly -
The Port has double booked the

runway. We were contacted by
the Jet Car people who want to
do a test run during lunch. The
membership had no problem with
it. Both days are general fly-in. The
day they aren't doing the test run
we will have a short fun fly.

July 13th - Float fly at lake Isabella
hosted by TCMAA. flying off the
water is fun, come check it out.
Next to the boat launch.

July 27-28 Faro Field - Dale
Robinson memorial fly in.

Sharon Diaz read the rules for the
WLC (weight lift challenge)

Meeting adjourned 7:15

This month at Sanderson
Field, Northwest RC is hosting
"Throwdown in the Sound" on
August 2nd Through the 4th. I

believe this is predominately 3d
aircraft although the flyer says
Turbines are welcome.

Our 2 day fly-in/ fun fly
went well. We had a pretty good
crowd on Saturday, the jet car
took up quite a bit more time than
advertised but did pay us \$300 for
the inconvenience. With landing
fee's, donations and all we almost
made enough to pay for 1 day.

The float fly at Isabella
went pretty good although the
wind came up pretty bad in the
afternoon. I've never seen a float
plane do a number of cart wheels
after landing before if that tells you
anything...

The NWSAM scale qualifier
is also this weekend at Faro Field
in Chehalis on Aug 2nd through
the 4th. It's a great field and
a great place to see a bunch
of beautiful scale models.
The scale Championships in
Wenatchee will be August
23rd through the 25th. This is a
Premiere flying site with grass
and blacktop runways a nice
club house and full hookups for
motor homes and trailers.

RC DEFINITIONS

PROPELLER: Wood, plastic or composite device used to stabilize inferior landings.

TRAINER: Inexpensive throw-a-way device used by beginning pilots to scare instructors and spectators with.

INSTRUCTOR: Old pilot who loves flying and teaching others to fly...usually can not tell you how many planes he has crashed.

TAIL ASSEMBLY: Fragile device which has affinity for door frames during non-flight transport.

TRANSMITTER or RECEIVER FAILURE: Something which happens only on first flight of a plane (usually the last flight, too). RUNWAY: Flat object used by student pilots to walk on to retrieve aircraft which "almost landed ok"

GLIDE-TIME (1): The time between the Engine falling out and the Airplane hitting the ground.

GLIDE-TIME (2): Time between the Wings folding and the airplane hitting the ground

DUCTED-FAN: A high-maintenance salad shooter

AEROMODELING : The art of turning precision-cut and glued balsa wood and foam into toothpicks and confetti AIRPLANE - Heavier than air machine that flies like it's heavier than air.

BALSA - An extremely light substitute for gold.

CRASH - Method of seeing inside a model airplane.

DINNER - A meal that is always cold by the time you get back from flying.

ELEVATOR - Device to prevent level flight.

ENGINE - Device that doesn't start when you want it to, and cuts your fingers.

FAIL SAFE - Option on PCM radio's that allows a pilot to choose whether to crash near him, or a long way away.

FLYING FIELD - Take off area. Landings occur elsewhere.

GIRLS - Something to be interested in before you take up flying.

HINGE - Device to prevent control surface movement and cause flutter.

INVERTED FLIGHT - Method of landing without wear and tear on the wheels.

JOKER - Person who invites you to "taxi back" after a dead stick landing.

RC DEFINITIONS CONTINUED

LANDING - Test of strength between your plane and the planet.

LB. - Abbreviation for "pound", used to describe how much overweight an airplane is.

MIXTURE SCREW - Device to meter too little fuel to the engine at critical moments.

MOTOR - Electric device that starts when you don't want it to, and cuts your fingers.

NOSE WHEEL - Device that prevents an airplane from landing without bouncing.

PLUG - (1)-Electrical device for making intermittent contact in your engine's ignition.

PLUG - (2)-Electrical device for making intermittent contact with your radio.

RADIO - Device that enables an airplane to crash in different places than it otherwise would.

RECEIVER - Part of the radio that picks up interference.

SKID - Another word for spinner.

SPINNER - Critical part of landing gear.

TANK - Temporary storage place for chemicals before they saturate the airplane.

**DUES ARE \$75 IF PAID BEFORE JAN
1ST, \$100 THEREAFTER.**

**IF YOU PAY BY MAIL SEND YOUR DUES,
PROOF OF 2019 AMA MEMBERSHIP
AND A SELF ADDRESSED STAMPED
ENVELOPE TO THE TREASURER:**
